MUHAMMAD ARBAZ

BACKEND DEVELOPER

PROFILE

Backend Developer with hands-on experience building scalable web apps using PHP, CodeIgniter, Laravel, MySQL, AJAX, and REST APIs. Worked on ERP, finance, HR, and real estate systems with focus on clean architecture and secure, optimized backend development. Also have experience in Flutter app development with API integration. Passionate about bridging backend systems with modern mobile interfaces.

WORK EXPERIENCE

SOFTOLOGICS

2025-2026

Junior Backend Developer

- Developed backend modules for ERP, real estate, and business management systems using CodeIgniter
- Collaborated with stakeholders to translate business requirements into software solutions
- Integrated REST APIs for web and mobile applications
- Optimized database queries and implemented secure authentication/session management

PROJECTS

Cars & Vans UK | CRM | Landing Page

- Built a custom CRM with a showroom landing page for Cars and Vans UK, replacing their spreadsheet workflow. Features include sales pipelines, finance calculators (HP, PCP, Lease), e-signature contracts, and inventory tracking.

Food Waste Management System

- Built a Food Wastage Management System with geo-location tracking, OTP-verified order handoffs, auto-expiry deletion, and PayPal integration including backend (CodeIgniter/PHP), MySQL database, admin panel, and dynamic AJAX UI.

Finance Management System

- Finance Management System with modules including expense tracking & reimbursement management, an analytical dashboard (total expenses vs. reimbursements), and employee management. Worked on developing and integrating these modules to give a clear financial overview.
